DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over SCHULTZ (US 5664451) in view of McCLURE ET AL (1272068).

SCHULTZ discloses a method and apparatus for bending sheet metal in which slits are simultaneously formed in parallel with one another (See Fig. 1) and the material is then bent along a line and a second row of slits are formed.

SCHULTZ does not disclose the slits as being made by slidably connected cutters. However, McCLURE ET AL discloses a method and apparatus in which metal is bent and cut by a pivoting/sliding blade (32) (See Fig. 3).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the cutters of McCLURE ET AL in the invention of SCHULTZ in order to produce a wider variety of consumer goods (i.e., slitted sheets).
